

ABHISHEK PALSODKAR

Data Analyst | Data Scientist

+91 9689684864 • Abhishek Palsodkar • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst and Data Scientist with an **M.S. in Data Science from the University of Arizona** and hands-on experience across **product analytics, BI, machine learning, computer vision, and AWS cloud deployment**. Skilled in **Python, SQL, Power BI, Pandas, statistical analysis, machine learning, and dashboard development**, with experience analyzing **400+ user interactions, 10,000+ computer-vision images, and 200,000-row business datasets** to generate actionable insights and support product decisions. **AWS Certified Solutions Architect – Associate** and **Microsoft Power BI Data Analyst (PL-300)** certified, with **JLPT N3-level Japanese proficiency** and a focus on Data Analyst, Data Scientist, BI, and technical roles in Japan.

CORE SKILLS

Programming & Data: Python, SQL, Pandas, EDA, Statistical Analysis, Data Cleaning, Predictive Modeling

BI & Visualization: Power BI, DAX, Power Query, Streamlit, Plotly, Tableau, Excel, Matplotlib, Dashboard

Machine Learning & AI: Scikit-learn, LightGBM, Regression, Computer Vision, Model Training, Model Evaluation

Data Engineering & Databases: MySQL, ETL, Data Pipelines, Data Warehousing, Data Modeling

Cloud & Systems: AWS, EC2, Amplify, IAM, Cloud Deployment, Web Hosting, Troubleshooting

Analytics & Collaboration: KPI Reporting, Customer Segmentation, Cohort Analysis, A/B Testing, Agile, Stakeholder Communication

Languages: English — Professional Working Proficiency | Japanese — JLPT N3 Level, Currently Improving

PROFESSIONAL EXPERIENCE

Junior Data Analyst — MapX

Feb 2024 – Apr 2025 | Remote | Internship

- **Analyzed JSON interaction data from 400+ bot/test users**, tracking session frequency, feature adoption, DAU/MAU and retention. **Identified behavior patterns and drop-offs** while collaborating with a 3-member team.
- **Developed user cohorts and engagement metrics** using feature adoption, interaction frequency, session depth and retention. **Recommended enhancements that increased engagement from 72% to 88%.**
- **Analyzed 70+ returning users** through cohort, funnel and behavioral segmentation across discovery, NFT selection and redemption. **Identified friction points and recommended UX/gamification improvements.**
- **Supported A/B testing across 190 users using a 50% experimental sample (~95 users)**, defining hypotheses and control/treatment groups. **Validated feature impact using engagement lift, conversion rate, retention and statistical significance.**
- **Coordinated analytics activities within a 3-member team**, monitored post-change engagement and prepared actionable reports. **Contributed to 200+ active-user traction and product development**, with documented XION partnership traction.

Data Scientist Intern — ViolaVizn Technologies

Jul 2023 – Dec 2023 | Remote | Internship

- **Developed a computer-vision PoC using 10,000+ accident and vehicle-damage images** for a confidential insurance client, supporting automated vehicle-damage assessment.
- **Trained and evaluated machine-learning models**, improving model accuracy from approximately **88% to 92%** through iterative model development and evaluation.
- **Coordinated a 3-member team** and maintained technical documentation and project deliverables to support successful PoC delivery.

PROJECTS

Netflix Customer Churn Analysis | Python, Pandas, SQL, Machine Learning • [GitHub](#)

- **Analyzed 2,500 customer records across 10 attributes** using Python, Pandas and SQL to identify customer segments, revenue patterns and churn-related behavior.
- **Identified \$31,271 in monthly revenue and 76.6% of customers aged 25–44**, developing a time-aware churn definition to support retention-focused segmentation.

Business Insight 360 | Power BI, DAX, Python, Streamlit, Plotly • App • [GitHub](#) • [App](#)

- **Built interactive Finance, Sales, Marketing, Supply Chain and Executive dashboards** analyzing \$823.85M in net sales and 36.49% gross margin across a 200,000-row dataset.
- **Developed a Streamlit web application with batched filtering, dynamic KPI recalculation and automated executive reporting**, supporting responsive analysis across region, category and product dimensions.

LinkedIn Job Postings – Skills & Salary Analysis | Python, Machine Learning, Regression • [GitHub](#)

- **Merged and processed relational job-posting datasets** and performed feature analysis to identify skills and factors associated with compensation.

- **Trained a LightGBM regression model and analyzed feature importance** to evaluate relationships between job requirements and salary.

AWS Personal Website | AWS, Cloud Deployment • [Live Site](#)

- **Deployed and maintained a personal website on AWS**, applying cloud hosting, deployment and service-management concepts.
- **Configured and monitored cloud-based deployment** using AWS services and concepts from Solutions Architect training.

EDUCATION

M.S. in Data Science - *University of Arizona* | Nov 2022 – Dec 2024 | **GPA: 3.33/4.0**

B.C.A. - *MIT World Peace University, Pune* | Jul 2019 – May 2022 | **CGPA:8.8/10**

CERTIFICATIONS & ACHIEVEMENTS

[AWS Certified Solutions Architect – Associate](#)

[Microsoft Power BI Data Analyst — PL-300](#)

[Google Advanced Data Analytics Professional Certificate](#)

2nd Place — Titan Hackathon

2nd Prize — Best Presentation, 3rd Year BCA
